

KT Drop Leg - Universal thigh mount - Quick detach vertical strap install

1. Your KT Drop Leg attaches to your Gun Belt via a vertical strap and locked by a reverse mounted metal slide.

2. The Quick detach vertical strap will have the female end with the nylon webbing attach to your belt and the male end of the buckle will capture the KT Drop Leg's standard vertical strap.

3. Start with the opening closest to the fork then loop back down to the opening furthest from the fork.

4. Reattach the buckle and you're done. Notice that the loose end of the vertical strap is facing your leg and snag free.
